## INTRODUCTION

Energy Manager Convention 2019 (EMC 2019) is a platform for Energy Manager from Regional countries and Malaysia, Industries and Public to share their experience especially in implementing Energy Management System (EMS).

### EMC 2019 centralises the:

- Cutting-edge information – The most current information on energy management especially on suitable technology or applications.
- Customized information that can solve problems – A platform to discuss information, share ideas, make meaning of the content and dialogue with others as they deepen their understanding.
- Experience and Knowledge sharing – Successful story of implementation of EMS and guidance.

### OBJECTIVES

- Sharing Learning and Best Practices from thought leaders and experts in EMS at ASEAN level.
- Engaging with like-minded people or industries with shared interests.
- Inspire and Generate Ideas and Thinking of EMS.
- Networking and meet new people and organisation from local and international.
- Acknowledge achievements and success story on the implementation of EMS in Malaysia and ASEAN.
